Views

Normal View includes panes for your presentation's outline, the current slide, and any notes for that slide. You will probably spend more time in Normal View than in any other view.

Slide Sorter View displays all the slides in your presentation as *thumbnails* (itty-bitty pictures). Use Slide Sorter View when you want to rearrange the slides in your presentation and add transition effects between them.

Slide Show View displays your presentation as an electronic slide show. Use Slide Show View when you want to deliver your presentation.

Outline and Slides Tabs

Outline Tab

This tab focuses on the content of your presentation instead of its appearance. Use when you want to develop your presentation and add large amounts of text.

Slides Tab

This tab displays the slides in a presentation as thumbnails, making it easy to navigate through your presentation. You can also rearrange, add, or delete slides.
